

FOR IMMEDIATE RELEASE

Complete Systems Integration, Inc. announces agreement with New Jersey Health Information Technology Extension Center

Complete Systems Integration will help area providers achieve Meaningful Use of EHRs and improve business operations

Newark, New Jersey, October 12, 2010 — Complete Systems Integration, Inc.™ (CSI), a provider of IT consulting services to HealthCare providers under its ***Lightswitch Computing***™ services plan, today announced a partnership with New Jersey Health Information Technology Extension Center (NJ-HITEC). Under the terms of the agreement, CSI will act as a health IT consultant and collaborate with NJ-HITEC in its efforts to promote Meaningful Use of EHRs among New Jersey-based providers.

Organized by the Office of the National Coordinator for Health Information Technology (ONCHIT), NJ-HITEC has been established to provide technical assistance, guidance, resources and information to accelerate provider adoption and support the Meaningful Use of EHRs. CSI under the direction of NJ-HITEC will work to assist the state's providers in their use of health information technology through targeted outreach, one-on-one consultation and user support.

"CSI has the expertise to help physicians enhance care delivery, improve patient outcomes and achieve Meaningful Use by providing support and strategic direction as these individuals prepare for, select and ultimately implement EHRs," said Bill O'Byrne, Executive Director, NJ-HITEC. "We are committed to providing assistance to our state's primary care providers serving at-risk populations in a cost-effective manner so that they can further their adoption of health information technology."

As part of the partnership, CSI will provide the following services:

- Support to help practices understand how to deploy technology in a way that complies with Meaningful Use standards; and
- Join in clinical and administrative workflow examinations to ensure each organization leverages the technology to its full potential.

NJ-HITEC and its partners like CSI will work with an estimated 5,000 priority primary care providers in New Jersey to meet Meaningful Use standards within the next two years.

"This is an extremely important opportunity for CSI. It represents a unique opportunity to be of service to providers and their patients and support the nation's efforts to modernize its HealthCare system. We look forward to partnering with NJ-HITEC and primary care providers in New Jersey to enhance care delivery, improve patient outcomes and achieve Meaningful Use. We are eagerly looking forward to working alongside the providers, to leverage our knowledge and provide support and strategic advice as they prepare for, select and implement EHRs.", said Tim Morgner, President of CSI. "Beyond achieving Meaningful Use, this collaboration offers New Jersey primary care physicians the opportunity to transform their organizations through the use of clinical and administrative technologies, resulting in healthier patients, more favorable clinical outcomes, improved workflow and enhanced financial performance."

About NJ-HITEC

New Jersey – Health Information Technology Extension Center (NJ-HITEC) is a federally recognized Regional Extension Center located on the campus of the New Jersey Institute of Technology. The sole purpose of NJ-HITEC is to assist New Jersey primary care providers in the successful adoption, implementation and use of electronic health records systems and to become meaningful users of those healthcare technologies, in order to deliver quality care improvements to New Jersey residents throughout the state.

About Complete Systems Integration, Inc.™

Complete Systems Integration, Inc.™ offers providers a full range of support services that are designed to achieve and go beyond Meaningful Use. These services include best practices which were developed at large, highly regulated and complex organizations, 24X7 support of computing environments, backup, virus protection, security, privacy consulting, and other technology services. The services are designed to address the evolving requirements and regulations that face providers today. All of these services are contained within the company's service offering called **Lightswitch Computing™**, a full menu of services aimed at making information technology as easy and dependable as **"turning on a light"**.
